**FOR IMMEDIATE RELEASE
ACTION ALERT**

CHINA IS BUYING TEXAS Oil Fields for \$1.3 Billion

November 7, 2015 – conservativefiringline.com posted an article titled: “China is Buying Texas Oil Fields for \$1.3 Billion.” In the article they say:

“Chinese cyber hacking has increased. The investment into American companies allows them access to areas they once did not have.

From a U.S. Government document on Chinese investments and National security:

*...The greatest potential impact on the United States could come in the form of Chinese investments in U.S. telecommunications companies. The vast global telecommunications and technology infrastructures owned or operated by these companies include undersea, terrestrial, wireless, and space-based networks. **These investments would increase China’s leverage in the U.S. marketplace and beyond (even if indirectly through joint ventures and third parties) and could eventually provide China access to or control of vital U.S. and allied information, networks, or segments of critical supply chains.***

Another key concern regarding the security of U.S. communication and computer networks relates to the reliability of electronics components found within the network hardware. National security vulnerabilities attributable to having critical infrastructure components manufactured, implemented, operated, or maintained by foreign actors are increasing at an escalated rate. Within government, steps can be taken to safeguard sensitive areas but at a substantially increased cost in both resources and lost opportunities to innovate. Trusted hardware and software produced domestically may cost more than commoditized products produced abroad. The government may also find that it will have to curb the infusion of ever-newer communications technologies into some especially sensitive areas in favor of retaining secure legacy technology models...”
