## HIP SURGERY

Three (3) patients limp into three different doctors with the same complaint. They all have trouble walking and may require hip surgery.

### Patient #1:

Is examined within the hour. Is x-rayed the same day, and has a time booked for surgery the following week at a total cost for the operation of \$2,400.00

### Patient #2:

Goes to the ER, is examined within the hour, is x-rayed the same day, and has a time booked for surgery the following week. Gets NO bill for Copay or deductible, in fact gets no bill at all. Total cost for this patient is \$0.00

### Patient #3:

See's the family doctor after already have been waiting 3 weeks for the appointment. Then has to wait another 8 weeks to see a specialist. Get's an x-ray, which isn't read until the following week, and finally, is scheduled for surgery 6 months down the road, of course pending the review board's concern of his age and his value to society. Receives bill for the deductible which is \$7,500.00, and has a copay of 20% which totals \$6,000.00, or a total cost of \$13,500.00.

Why the different treatments for the 3 patients ?

1. Patient #1 was a Golden Retriever taken to a Vet.
2. Patient #2 was an Illegal Alien
3. Patient #3 was a Senior Citizen on Obama Care.

**In November, should Hillary win the election,  
we'll all have to find a good Vet.**
