**FOR IMMEDIATE RELEASE  
ACTION ALERT**

## **THE STUPIDITY Of Condemning Columbus & Confederates**

10/10/17 – **EDWARD C NOONAN, Former 2012 & 2016 Presidential Candidate alert:**

**Yesterday (10/9/17) was Columbus Day. Every reference in the news media to Columbus Day (via Google) was negative and hostile.**

**Here are some of yesterday's HEADLINES & stories:**

*"Columbus Day nixed for 'Indigenous Peoples' Day' by more universities nationwide" (Fox News); "Trump Skips Mention of Native Americans in Columbus Day Proclamation" (US News & World Report); "Columbus Day Has Drawn Protests Almost From Day 1" (NY Times); "Trump's praise of Columbus omits dark history" (CNN); "How Columbus Day Fell Victim to Its Own Success" (theatlantic); "Columbus Day? True Legacy: Cruelty and Slavery" (huffingtonpost); etc, etc!*

**The Marxist have won! One of their stated planks in "[The Communist Takeover Of America - 45 Declared Goals](#)" is to: "#30. Discredit the American Founding Fathers. Present them as selfish aristocrats who had no concern for the "common man.""**

**The TRUE FACTS:**

*"The first monument for Columbus was erected on the occasion of the 300th anniversary of the discovery of the New World, in 1792, in Baltimore, Md."*

*"In the same time there was a serious movement afoot to rename the United States of America "Columbia." That goal was not achieved, but the capital district was given the name District of Columbia, and several cities across the United States were named Columbus or Columbia. In the 19th century about a dozen other monuments were erected to honor the Admiral."*

**America has come from this early appreciation for Columbus to this thuggery:**

*(left) Columbus Statue vandalized in Hazleton, PA*

**The George Soros funded Anti-America groups have also vandalized Confederate monuments as well.**

**All of the George Soros Marxist groups in the anti-Columbus movement use a lie to further their agenda. **This is the LIE:****

***"The Europeans brought diseases such as typhoid, cholera, yellow fever, smallpox, measles, whooping cough and influenza to the indigenous population. Their numbers fell from eighty million to under one million in less than five hundred years."***

**Let's examine these falsehoods! What are these diseases and how are they transmitted?**

**We declare that the demise of the Aztecs was NOT because of the Spaniard coming to their country. Instead, we stand with [Dr. Acuna-Soto](#) (a disease specialist) who is convinced that "the death knell for**

*the Aztecs was an indigenous hemorrhagic fever virus spread by rodents, not the Spanish conquest. The rat population was depleted during the drought, when food was scarce. But once the rains returned, food and water were suddenly plentiful and the number of infected rats exploded, spreading the deadly scourge to humans."*

**Likewise, the likelihood that the following diseases originated in only in Europe and were transmitted via a ship for 10 weeks with live bacterium is rather slim. Example:**

**Typhoid** - *various strains of Salmonella bacterium. It occurs predominantly in association with poor sanitation and lack of clean drinking water.*

**LIE: Christopher Columbus saw land after nearly 10 weeks at sea. Early in the morning on October 12, 1492, the Pinta saw land. There was no report in Columbus's log stating that any on his crew had Typhoid. Nor was there any written record of major Typhoid epidemics until 1770.**

**Cholera** - *is contracted by consuming food or water contaminated with the fecal bacteria *Vibrio cholerae*. Cholera is found EVERYWHERE when fecal matter gets into the water... including the Indian population's water! Since the Indians did not have a written language, there is no proof one way or another!*

**Yellow fever** - *Flavivirus causes yellow fever, and it's transmitted when an infected mosquito bites you. Mosquitoes become infected with the virus when they bite an infected human or monkey. The disease cannot be spread from one person to another. **The likelihood that***

**Europeans brought mosquitoes with them, is very low. The mosquitoes were already in America and cannot be blamed on the pilgrims or colonialists.**

**Smallpox** - *Smallpox is caused by infection with the variola virus. The virus can be transmitted directly from person to person. Direct transmission of the virus requires fairly prolonged face-to-face contact. After exposure, it takes between 7 and 17 days for symptoms of smallpox to appear (average incubation time is 12 to 14 days). During this time, the infected person feels fine and is not contagious.*

**LIE: So it is unlikely that smallpox would continue for the 10 weeks that it would take to sail across the Atlantic Ocean! The Mayflower sailed for more than two months (66 days) at sea, before the Pilgrims finally arrived at Cape Cod on November 11, 1620.**

**Wikipedia:** *"During the 1770s, smallpox killed at least 30% of the **West Coast Native Americans**. The smallpox epidemic of 1780–1782 brought devastation and drastic depopulation among the Plains Indians. This epidemic is a classic instance of European immunity and non-European vulnerability."* **PLEASE NOTICE IT SAYS WEST COAST NATIVES! How many Europeans do you think were in California in 1780 (Zero?) How many Europeans were ON THE PLAINS in 1780? (Zero?) Indians have no written language... How is this known?**

**Measles** - *are caused by infection with the rubola virus. The virus lives in the mucus of the nose and throat of an infected child or adult. The disease is contagious for 4 days before the rash appears, and it continues to be contagious for about 4 to 5 days after. Again, it is unlikely the measles virus came ONLY from Europe or lasted 66 days across the ocean.*

**Whooping cough** - *Pertussis, also known as whooping cough, is a highly contagious respiratory disease. It is caused by the bacterium Bordetella pertussis. Pertussis is known for uncontrollable, violent coughing which often makes it hard to breathe. This would be considered a "modern disease." Since it is identified as the presences of the bacterium Bordetella pertussis the early Indians or early white settlers who not know it except by the bronchitis like cough. Both Whooping cough and Bronchitis is similar to each other.*

**Influenza** - *Initially, the flu may seem like a common cold with a runny nose, sneezing and sore throat. But colds usually develop slowly, whereas the flu tends to come on suddenly. And although a cold can be a nuisance, you usually feel much worse with the flu.*

**The flu originates among birds and other animals such as pigs. It is assured that there were birds in early America and flu was present EVERYWHERE among the early Indians. Colonial newspapers show no such epidemics! LIE: Indians never had the flu before 1492!**

oooooooooooooooooooooooooooo

**Again, the [American Resistance Party](#) declares that the current anti-Columbus and anti-Confederate bias in America is nothing more than a Marxist scheme to bring tension and strife into the American way of life. And anything that Columbus did 525 years ago has absolutely NO BEARING on events of today! It's plain stupidity!**
