Message to Q
The Camp Fire was a pre-planned event! I saw activity in the community of Paradise that gave me the sinking feeling that something was going to occur. I even told my daughter the week previous that something was going to happen. Capstone company needs to be completely investigated. I was told they were contracted by PG&E and working in the area for a couple of weeks previous to the event. I saw strange things during the fire being done by this company. Certain houses surrounded by fire trucks as up the street people burned alive in their cars. On top of that the town of Paradise turned the water off which prevented firemen from doing their jobs. the 3rd day Cal Fire called and demanded the water be turned back on. Many years ago we discovered that approx 75% of the hydrants in our town are blank. They are not connected to any water source at all. I lost everything I own to this Fire. Most of the town did. Many people lost their lives trying to escape. I have lived in this town since 84 and have seen some of the worst fire seasons on record. This was not a regular fire. The wind was NOT blowing like they claim except in the vicinity of the fire itself. There are roads with every house burnt to the ground but garbage cans standing perfectly untouched in the street between the burnt houses. In the weeks before many of the retirement and convalescent homes had evacuation drills and made sure that each person had a bag packed with 3 days worth of clothes and meds which stayed packed and ready after the drill. There is so much more to share, but there is no one her trustworthy to talk to.

California "wildfires" line up EXACTLY in the same path as the "California High Speed Rail System"
