**FOR IMMEDIATE RELEASE  
ACTION ALERT**

## **OROVILLE DAM Truth or Lies**

**05/17/19 – EDWARD C NOONAN, Former 2012 & 2016 Presidential Candidate alert:**

(Above) This Oroville Dam worker is doing “patch-&-pray” repair work. These 1” cracks are being called “hairline” cracks. It is all SMOKE AND MIRRORS! This is being done to EVERY DAM IN AMERICA!

[nytimes.com](http://nytimes.com) posted an article on 2-23-2017 titled, **America’s Aging Dams Are in Need of Repair.** They started their article with: “Nearly 2,000 state-regulated high-hazard dams in the United States were listed as being in need of repair in 2015, according to the Association of State Dam Safety Officials. A dam is considered “high hazard” based on the potential for the loss of life as a result of failure.

*By 2020, 70 percent of the dams in the United States will be more than 50 years old, according to the American Society of Civil Engineers.*

*“It’s not like an expiration date for your milk, but the components that make up that dam do have a lifespan.” said Mark Ogden, a project manager with the Association of State Dam Safety Officials.*

The United States Army Corps of Engineers keeps an inventory of 90,000 dams across the country, and more than 8,000 are classified as major dams by height or storage capacity, according to guidelines established by the United States Geological Survey.

**The State of California is about ready to test the spillway gates in the Oroville Dam.**

**What could go wrong?**

**The rusty old gates at the Oroville spillway have sat idle for over two years. And now they are cranking it all up and hope it all works? Watch and see if what happened at Folsom (1995) when the gate broke open, happens again in Oroville. The metal parts on the gates are 25 years old and it's not looking good! If you want to see how bad the gates are, check out this video from [Millie Kay](#) (go to 4:41):**

**[Are Oroville Dam spillway gates safe? \(And what about those trunnions and tendons?\) 8/2/17](#)**

**Also, watch this video about problems at the Oroville Dam. It's probably happening at a dam near you! It's titled, ["Oroville Dam -July 30 2017 -Truth or Lies NEW!"](#)**
