**FOR IMMEDIATE RELEASE  
ACTION ALERT**

## **OROVILLE DAM: Worst Disaster In The History Of California?**

**05/23/19 – EDWARD C NOONAN, Former 2012 & 2016 Presidential Candidate alert:**

**The Oroville Dam in Northern California is near failure. There are at least two of the spillway gates that are in major disrepair. At least one of the gate is gushing hundreds cfs of water. There are major leaks in the spillway, there is a vast sink-hole, there is a vast vortex going into the spillway... and that is only a few of the dangers. However, one local leader had chided the CA Department of Water Resources (DWR). He says:**

*"I'm very concerned about the lake levels," District 1 Supervisor Bill Connelly said Tuesday during the Board of Supervisors meeting.*

*"Lake Oroville is being run in an antiquated and linear matter. (DWR's) priority seems to be water delivery instead of public safety. We need to move into the next century. Climate change is real here. We've had warm rain on snow before, and if we have warm rain on snow right now, it would be one of the worst disasters in the history in the state."*

**The Lake level is at 891.41. The overflow is at 900. Most Dams cannot handle an overflow and the gates will fail at that point. A broken dam would flood Butte Co, Sutter Co, Yuba Co, Placer Co, Colusa Co, Sutter Co, Yolo, Co, Sacramento Co, San Joaquin Co, and Solano Co. 1,000,000 people would have to evacuate!**
