EXCLUSIVE:

Virus researchers uncover new evidence implying COVID-19 was created in a lab

lifesitenews.com says: “A new scientific study contradicts scientists who claim “zero evidence” for lab origin of COVID-19, “the data indicates that SARSCoV2 [COVID-19] is uniquely adapted to infect humans, raising questions as to whether it arose in nature by a rare chance event or whether its origins lie elsewhere [Wuhan Institute of Virology?].” **More proof at:**

May 16, 2020 (LifeSiteNews) – A team of Australian scientists has produced new evidence that the novel coronavirus that causes COVID-19 is optimized for penetration into human cells rather than animal cells, undermining the theory that the virus randomly evolved in an animal subject before passing into human beings, and suggesting instead that it was developed in a laboratory.

The study, which has not yet been peer reviewed, provides new but not yet conclusive evidence favoring the theory that the novel coronavirus originated not in a food market as has been claimed, but rather in a laboratory, presumably one operated by the Wuhan Institute of Virology in Wuhan, China, the city in which the first outbreak of COVID-19 occurred in December of 2019.

The lead researcher on the team says that the results represent either “a remarkable coincidence or a sign of human intervention” in the creation of the virus. **(Read full article at link below)**
